Anderson Family Football Complex

Lawrence, Kansas (July 5, 2008) - The University of Kansas is set to open the new Anderson Family Football complex this summer. Situated next to the football stadium, the complex has been designed to provide the latest in communications and video technology.

In order to successfully transmit the video signal to over 50 televisions throughout the facility, LanTel Communication & Underground Services partnered with Taikan Company. The solution consists of Taikan's family of indoor vertical splitters (DSxGV) and mainline taps (DT55G Series). In addition, LanTel also used Taikan's hardline connectors (MLC). During the final weeks, Taikan representatives worked together with LanTel to make sure the products were appropriately installed and ready to go for opening day.

“We are delighted to assist LanTel Communication during the construction of the new Anderson Family Football Complex. Headquartered in Lawrence, we are always looking for ways in which we can contribute back to the local University.” Ching Wang, founder of Taikan Company and University of Kansas alum.

The Anderson Family Football Complex is scheduled to open the middle of July.

About Taikan

Taikan Company is a leading manufacturer of networking equipment for the wireless, satellite, telecommunications and cable industry. For over 30 years, Taikan has focused on delivering innovative and reliable network solutions for video service providers around the world.
