

Company Profile

Founded in 1972 in Lawrence, Kansas, **Taikan Company Inc** is a leading designer, manufacturer and supplier of network equipment used to deliver broadband services over the network. Taikan products are used in Fiber PON, HFC, RF, and Satellite network infrastructures.

Core Competencies

- **Manufacturing Products Adherent to**
DOCSIS 3.1, Standard Spectrum DOCSIS (FDD) and Full Duplex DOCSIS (FDX) Compliant Systems IEEE C62.41-1991 SCTE Guidelines.
- **R&D Engineering**
Knowledgeable team to determine network requirements and product solutions for current/future projects.
- **OEM/ODM Services**
Design and manufacture customized equipment to solve unique client needs in a wide range of network types.
- **Logistical Support**
Procurement and distribution of equipment, facilities, technical information, and trained personnel essential to the proper operation of a plan or project.
- **Quality Control**
Active measures to detect, isolate and correct variability in the production process, thus ensuring the highest quality product.
- **Warehouse Distribution**
Maintenance and usage of our facility for receipt, temporary storage, and redistribution of goods according to customer orders.
- **Industry Involvement**
Active engagement with leading industry organizations and manufacturing products that adhere to various industry standards (IEEE, IEC, CENELEC, ISO, SCTE).

Differentiators

- **Control of both Design and Manufacturing, allowing for greater agility and flexibility in product development. Many competitors outsource their manufacturing.**
- **International experience with proven network technologies used in different regions of the world. Applying this knowledge to new network development.**
- **Operations centrally located in Kansas and Manufacturing facilities in Taiwan allow for wide coverage of support. Teams provide assistance at all stages of the buying process and provide ongoing support post-purchase.**
